

MAGNET AUDIT AND INSPECTION SERVICE

Magnetic Separation in Pharmaceutical Industry

OUR EXPERTISE

Magnetic Equipments require testing and certifying at least every 12 months to ensure that the equipment still complies with the industry standards.

Permag endorses magnet validation and testing services to assist in understanding the status of your magnets with the option of providing recommendations conforming to your magnet performance.

Magnet validation and magnet strength checks are essential to maintain magnet efficiency.

This process allows us to work with you to in controlling hazards and reducing risk. We offer magnet testing services conducted by our trained technicians, using systematic operating procedures and documentation.

HOW IT WORKS

Our trained technician uses a calibrated gauss meter with minimal testing time and assesses the condition and efficiency of critical and upstream processing magnets. On the basis of our analysis we provide magnet performance reports of magnet strength, extraction efficiency and audit Certificates with a validity of 12 months.
